Dear Friends of St. Jude,

Thank you so very much for your generous gift of \$665 to St. Jude Children's Research Hospital. Your support allows us to continue the vital research that will help to save the lives of precious children like MacKenzie . . .

MacKenzie was just 3 weeks old when her ophthalmologist diagnosed her with retinoblastoma, a malignant tumor of the retina. MacKenzie's father also had retinoblastoma as a child, and because it is a hereditary trait that can be passed from a parent to their child, doctors began checking MacKenzie at birth.

MacKenzie was immediately referred to St. Jude, where our doctors began chemo to shrink the tumors and then performed laser therapy to eradicate them.

When asked about St. Jude, MacKenzie's mom says, "This place is wonderful. You have all of these fears because you don't know what's going to happen, but everybody here just makes you feel like you're at home." MacKenzie's grandmother, who is very involved in her granddaughter's care, adds, "It's like they're taking care of their own child -- you can tell that they love her."

Today, MacKenzie returns to St. Jude every six weeks for checkups, and she just celebrated her first birthday. Her mom says, "She's walking all over the place. She waves bye-bye and she loves dancing to music." Special moments like these would not be possible without the support of generous friends like you.

You have given a priceless gift to MacKenzie, and all the children of St. Jude. It is your support that allows St. Jude to continue the vital research that will one day unlock the cures to these killer cancers, and give every child who comes to us a second chance at life.

Very truly yours,

John P. Moses

***In accordance with I.R.S. guidelines, no goods or services were given in exchange for this gift. Federal tax law requires that we give you this receipt to substantiate your charitable deduction.***

-----  
St Jude Children's Research Hospital is internationally recognized for its pioneering work in finding cures and saving children with cancer and other catastrophic diseases. Founded by late entertainer Danny Thomas and based in Memphis, Tennessee, St. Jude freely shares its discoveries with scientific and medical communities around the world. No family ever pays for treatments not covered by insurance, and families without insurance are never asked to pay. St Jude is financially supported by ALSAC, its fund-raising organization.
